1. It was learned on 15 November 1950, that the signal communication center of the Mecklenburg Volkspolizei is located on Pfaffenteich, Schwerin (M 54/F 46). The teletype room of the signal communication center is equipped with four tape printers, three sheet printers, two tape transmitters, one hand-operated perforator, one automatic perforator, and a 20-unit switchboard.
2. It was learned in late November, that a total of 1.2 million bricks, and large quantities of concrete and timber were allocated for the reconstruction of police installations in Sternbucholz.
3. It was learned in mid-December that despite adverse weather conditions the reconstruction of the VP installations in Sternbucholz was being expedited. Work was done in two shifts. Stove fitters in Schwerin received orders from the Mecklenburg Ministry of the Interior for the installation of 304 tile stoves, to be ready for use at the Sternbucholz site no later than 15 February 1951. *

25X1A [REDACTED] Comment. The apparently intended reconstruction of Camp Sternbucholz of the 1st VP Bereitschaft (Inf) coincides with numerous building operations reported from other KGBA police posts. See [REDACTED]
